Streamlining Product Catalogues with
n8n Workflow Automation

● Team: Akshay, Harsh, Lakshay, Ronit, Mahnoor, Dilip ●

Four Key Issues

Manual Process

Creating and updating product catalogues required significant manual effort and coordination.

Time Consuming

Each catalogue update meant hours of formatting and checking. It can take 4-5 hours to create catalogues.

Error Prone

Manual data entry led to inconsistencies, formatting errors, and mistakes across different catalogue versions.

Difficult to Scale

As our product range grew, maintaining multiple catalogues became increasingly challenging and unmanageable.

The Solution & Impact

Built an **n8n workflow** that automatically generates catalogues when Google Sheets are updated

How It Works

1

Update product data in Google Sheets

2

Trigger activates n8n workflow

3

Catalogue generated automatically

Key Benefits

Saves Time

Hours of manual work reduced to minutes

Eliminates Errors

Consistent, accurate catalogues every time

Enables Scalability

Handle growing product range effortlessly

Improves Collaboration

Team members can update data independently

Real-Time Updates

Catalogues always reflect latest product data

Thank You.
