From Invisible to Inevitable.

THE CONTEXT

Your Growth Labs x Ubon partnership engagement

Category: Earphones and Earbuds on Blinkit

Ubon presence: Listed on Blinkit since 2024, 600 ratings, 3.0 average

Strategic question: How does Ubon move from invisible to inevitable?

Geographic scope: 10 metros, Bengaluru-led test

Roadmap: 90 days, three phases, gated milestones

The product is already live. The brand is invisible. We fix discoverability and trust, not distribution.

OUR APPROACH - 90 DAY ROADMAP

1

STABILIZE THE FOUNDATION

Days 1 to 30

Delist failing SKUs, fix in-box contents, reset MRP, reorder listing infographics. Stop the bleed before adding spend.

2

ACTIVATE THE BRAND NODE

Days 31 to 60

Amazon Vine seeding, post-purchase review flow, nano-influencer campaign live. Move rating from 3.0 to 4.0 star.

3

SCALE WHAT WORKS

Days 61 to 90

PLA spend live on 10 Bengaluru dark stores. 10-Minute Challenge campaign drops. Decision gate: expand to Mumbai or pause.

QUICK COMMERCE MARKET SHARE (MID 2025)

Blinkit pulled past 50% share by Sept 2025. AOV ~Rs.709 vs Instamart Rs.619.

boAt declined 11% YoY in Q1 2025 amid intensifying competition. First-time buyer pool largely captured. Repeat buyers upgrading to feature-rich alternatives. Slow entry into AI-led audio.
THIS IS UBON'S OPENING.

Boulton Audio is the RIGHT benchmark, not boAt. Same Rs.999 to 1,499 tier. +46% YoY growth. Achieved through portfolio refresh and youth-centric branding without celebrity excess. Study their review velocity and attribute mix.

Quick commerce gaining traction for TWS (Counterpoint Q1 2025). No earbuds brand has dominated Blinkit yet. Q4 2025 saw 12% YoY market recovery driven by festive plus portfolio refreshes.
FIRST MOVER WINDOW STILL OPEN.

BRAND PERFORMANCE ACROSS PLATFORMS - 8 BRANDS BENCHMARKED

Brand	Amazon SKUs	Amazon Rating	Amazon Reviews	Flipkart Reviews	Blinkit Presence	Price Range Rs.	What They Own

WHO WINS WHERE

	AMAZON	FLIPKART	BLINKIT	ZEPTO
1st	boAt	boAt	boAt	boAt
2nd	JBL	JBL	Noise	Boult
3rd	Noise	Noise	Zebronics	Portronics
			Ubon TWS = invisible	Ubon = wired only

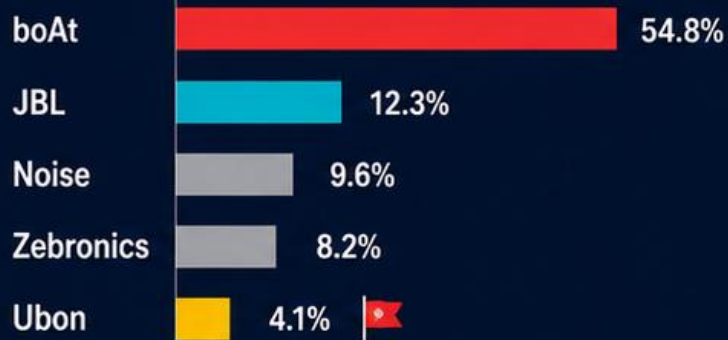

Pattern: boAt dominates discovery on every platform. The gap is everywhere, not just on Blinkit.

WHAT EACH BRAND OWNS IN THE BUYER'S MIND

boAt	Budget audio energy, youth lifestyle, the default first earbud
JBL	Trusted premium sound, the safe expensive choice
Noise	Design-led, ENC quality, fitness positioning
Boult	Value-spec leader, the rising challenger
Zebronics	Price floor, basic functionality, distress signal
UBON	NOTHING - 4.1% consideration, no activated node

THE WHITE SPACE: Professional call clarity under Rs.1,000 - no brand currently owns this

BRAND CONSIDERATION

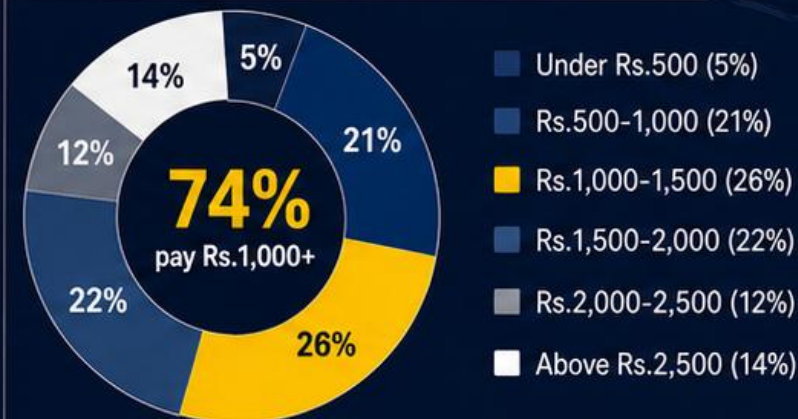

Ubon is not in the evoked set for 95.9% of buyers

TOP PURCHASE DRIVERS (RANKED 1 TO 7)

Every Ubon listing leads with ENC. Survey says Sound Quality leads.

WILLINGNESS TO PAY ON BLINKIT

Ubon sells J31 at Rs.649. Underpriced for the channel buyer.

PRIMARY USE CASE

Work calls = 38.2%. No brand at Rs.999 owns this. Ubon's winning zone.

TRUST TRIGGERS

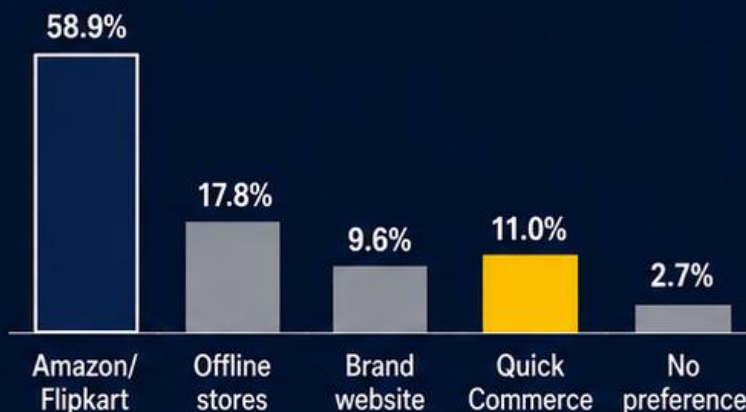

UBON'S CELEBRITY PORTFOLIO IS MISALIGNED

- Tiger Shroff (fitness/action) - wrong archetype for 38.2% WFH buyer
- Dhruv Jurel + Rajasthan Royals (cricket) - reach yes, but no product story
- Neha and Tony Kakkar (music) - audience overlap with boAt's territory
- Total est. spend: Rs.8-15 crore per year on signals nobody asked for

Survey says influencers drive only 20.5% of trust.
The portfolio is solving for awareness, not consideration.

INCORRECT ATTRIBUTE SHOWCASING

Ubon listings lead with ENC on infographic slide 1. Survey ranks Sound Quality as the #1 purchase driver. Reordering the infographic carousel - Sound first, then ENC, then Battery, then Accessories - is the single cheapest conversion fix available.

Implementation cost: Rs.0. Expected conversion lift: 8-15%.

THE Rs.20 FIX

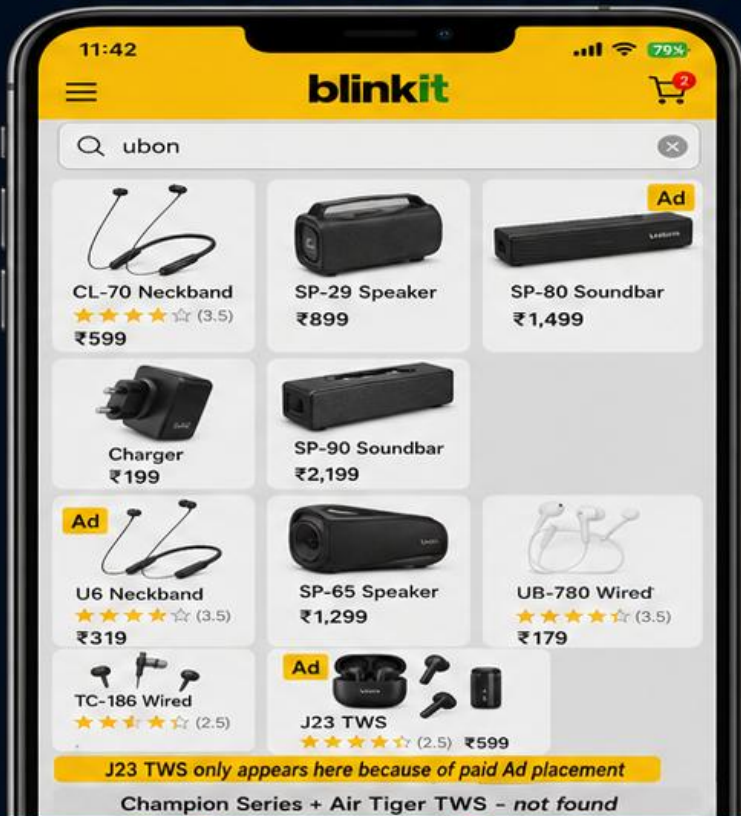

Missing USB-C cable and ear tip sizes = #1 complaint pattern in Ubon Amazon reviews. Adding both costs Rs.20-25 per unit and eliminates the top negative review trigger. First-use experience shifts from punishment to reward.

Per unit cost: Rs.20-25. Per unit margin protected: Rs.300-500.

CRITICAL: Champion Series and Air Tiger TWS - both out of stock again. Zero TWS presence in organic Blinkit search today.

The only TWS earbud visible is J23 via paid Ad. Remove the Ad spend and Ubon has no TWS presence at all.

CL-70 Neckband, Black	Neckband	★★★★☆ (3.5)	186	Rs.599	Rs.1,599	1 left

TWS category: 1 SKU live via paid Ad at 2.5 stars. 2 SKUs out of stock.

Earphone category: fragmented across neckbands and wired with no flagship product. Average rating across all SKUs: 3.0 to 3.5 stars.

ZERO ORGANIC TWS PRESENCE

The only TWS earbud visible on Blinkit search for "ubon" is J23 via paid Ad. Remove the Ad and Ubon has zero TWS earbuds on the platform. Champion Series and Air Tiger TWS are out of stock again.

Impact: Zero new-to-brand discovery and conversion.

STOCK INSTABILITY KILLS RANKING

Both TWS SKUs were out of stock for multiple days in the past 7 days. Blinkit algorithm penalizes stock-outs heavily. Recovery needs 7-14 days of full stock + velocity.

Fix: Maintain 30+ units per dark store at all times. No stock-outs for 2 straight weeks minimum.

TRUST GAP AT THE FIRST LOOK

J23 TWS (the only visible TWS) is at 2.5 stars with 614 reviews. 49% of buyers filter below 4.0 stars. Ubon never crosses the trust gate on Blinkit.

Fix: Amazon Vine + review velocity + better first experience to cross 4.0 star quickly.

Ubon hits 7 of 10 winning specs at Rs.999. The gap is not engineering - it is naming, packaging, and infographic order.

Implementation cost of all three fixes combined: Rs.20 per unit plus zero for the rest.

THE Rs.20 FIX

Top complaint pattern in Ubon Amazon reviews: missing USB-C cable and single ear tip size in box. Adding USB-C cable plus S, M, L ear tip set costs Rs.20-25 per unit. Eliminates the number 1 negative review trigger. First use experience shifts from frustration to satisfaction.

Cost per unit: Rs.20-25

Est. 1-star reviews prevented per 100 units: 8-12

NAME THE HERO FEATURE

boAt calls it Beast Mode. Noise calls it Quad-mic ENC. Boulton calls it Powerplay. Ubon's ENC mic has no name. Assigning a branded name - Crystal Call Mode, ClearVoice ENC, anything ownable - costs Rs.0 and adds a perceived spec that competitors charge Rs.200 more to include. Add it to the listing title and infographic slide 3.

Cost: Rs.0

Perceived value add: Rs.150-200

J23 TWS - PAUSE THE AD IMMEDIATELY

J23 Topper TWS is running a paid Blinkit Ad at 2.5 stars across 614 ratings. This is the worst TWS listing live on Blinkit today. Paid placement drives traffic to a product that will be rated 1 or 2 stars by new buyers. Every Rs.1 of Ad spend on J23 generates a new negative rating. Pause Ad. Fix product. Relist.

Current J23 rating: 2.5 stars (614 ratings)

Action: Pause Ad. Fix. Relist.

Every brand sets MRP high and sells far below it. boAt MRP Rs.3,999 sells at Rs.999. Ubon must do the same. Set MRP at Rs.2,999. Operate between Rs.999 and Rs.699 only. Never sell at Rs.2,999. The MRP is the anchor. Rs.999 is the standard window. Rs.699 is the drop window. That is the entire system.

MRP ARCHITECTURE - BEFORE VS AFTER

SKU	Old MRP	Sell Today	New MRP	Price 1	Price 2
Champion Series TWS	Rs.2,499	Rs.569	Rs.2,999	Rs.999	Rs.699
J23 Topper TWS	Rs.1,549	Rs.599	Rs.2,499	Rs.899	Rs.699
U6 Neckband	Rs.799	Rs.319	Rs.1,499	Rs.449	Rs.349
UB-780 Wired	Rs.249	Rs.179	Rs.999	Rs.299	Rs.249

Price 1 is the standard window price. Price 2 is the drop window price. The product alternates between these two. MRP never changes. Sell price never goes above Price 1.

Higher MRP is not dishonest. It is the market standard. Every brand does it. Ubon was the only one not doing it correctly.

boAt: MRP Rs.3,999 - Sell Rs.999 - 75% off

Noise: MRP Rs.2,499 - Sell Rs.899 - 64% off

Boulton: MRP Rs.1,999 - Sell Rs.699 - 65% off

UBON TARGET: MRP Rs.2,999 - Sell Rs.999 - 67% off

HOW THE TWO-PRICE CYCLE WORKS

1

DAY 1 - LAUNCH AT Rs.999

Champion Series goes live at Rs.999 against MRP Rs.2,999. 67% off banner active on listing. Limited period offer badge shows. PLA spend starts now. This is the first velocity window.

67% OFF Days 1 to 15

2

DAY 16 - DROP TO Rs.699

Sell price drops from Rs.999 to Rs.699. Now 77% off Rs.2,999. Because Rs.699 is lower than the Rs.999 launch price, Blinkit automatically generates the Lowest in 30 Days badge. No manual claim. No extra spend. The algorithm does it because the math is real.

77% OFF **LOWEST IN 30 DAYS - AUTO BADGE** Days 16 to 30

3

DAY 31 - BACK TO Rs.999

Price goes back up to Rs.999. Rs.699 window is closed. Buyers who missed the drop know the price rose again. Anticipation builds for the next drop window. The scarcity was real.

67% OFF Days 31 to 45

4

DAY 46 - Rs.699 AGAIN

Second drop window opens. Rs.699 is again lower than current Rs.999 price. Lowest in 30 Days badge triggers again automatically. New buyers and returning buyers both convert. Review velocity picks up each cycle.

77% OFF **15-DAY LOW BANNER** Every 30 days

5

FESTIVAL - Rs.599 FOR 5 DAYS

Once per quarter only. Diwali, Holi, Onam. 80% off Rs.2,999 dominates the Blinkit category scroll. Returns to Rs.999 immediately after. This is not part of the regular cycle.

80% OFF **5 DAYS MAX** Festival only

TWO PRICES. ONE CYCLE. REPEAT FOREVER.

Rs.999 STANDARD. Rs.699 DROP. FESTIVAL Rs.599.

- RULES THAT NEVER CHANGE**
- ✓ MRP never changes once set.
 - ✓ Only two sell prices exist - Rs.999 and Rs.699.
 - ✓ Product price never stays at Rs.699 for more than 15 days.
 - ✓ Cycle repeats every 30 days without fail.
 - ✓ Festival price Rs.599 used maximum 5 days per quarter.
 - ✓ Never create other prices like Rs.899, Rs.449, Rs.1,199. Only two.

ROOT CAUSE: J23 TWS running paid Ad at 2.5 stars. Champion Series and Air Tiger out of stock. Zero organic TWS presence today.
Fix the catalogue before spending on dark store expansion. Expansion on a broken catalogue accelerates failure not growth.

CATALOGUE ACTIONS - PRIORITY ORDER

- 1 STOP THE BAD AD**
Ubon is paying to advertise an earphone with 2.5 stars. Every click makes the brand look worse. Stop the ad today.
Pause now. Restart only at 4.0 stars.
- 2 MAKE UBON FINDABLE**
When buyers search earphones on Blinkit, Ubon does not show up. The product tags in the backend are wrong. Fix them and Ubon appears in search.
Fix tags in seller portal - 2 hours.
- 3 ONE PRODUCT. ALL FOCUS.**
Pick Champion Series as the single Blinkit hero. Put all money, all stock, and all reviews behind this one product until it becomes the number 1 Ubon earphone.
One SKU wins before adding more.
- 4 NEVER GO OUT OF STOCK**
Every time Ubon goes out of stock, Blinkit pushes it down in search. Recovery takes 2 weeks. Keep at least 30 units at every active store.
Reorder trigger at 15 units remaining.
- 5 PUT SOUND FIRST**
The first image buyers see on Blinkit shows ENC. But buyers care most about sound quality. Swap the order. Sound first, everything else after.
Change listing image order - free.

FOLLOW THE PLAYBOOK. WIN THE MARKET.

90-DAY ROADMAP - BENGALURU SANDBOX FIRST

Three phases. Three gates. One path to scale.

PHASE 1

STABILIZE

DAYS 1 TO 30

- Pause J23 TWS Ad on Blinkit immediately - 2.5 star listing cannot receive paid traffic
- Fix Blinkit search taxonomy - add TWS earbuds, wireless earphones under 1000, ENC earbuds tags
- Add USB-C cable and 3 ear tip sizes to Champion Series box - Rs.20 per unit fix
- Reset Champion Series MRP to Rs.2,999 across Blinkit and Amazon seller portals
- Reorder listing infographic - Sound first, ENC second, Battery third, IPX4 fourth
- Enroll Champion Series in Amazon Vine - target 30 seeded reviews by Day 30

PHASE 2

ACTIVATE

DAYS 31 TO 60

- Launch 10 to 15 nano-influencer Sunne Ka Haq content pieces on Instagram Reels
- Start using micro influencers on YouTube to mention Ubon as a good and competitive product
- Post-purchase WhatsApp review nudge to Blinkit Champion Series buyers at Day 3 after delivery
- Batch QC testing live at dispatch warehouse - 5 minute functional check per unit
- Amazon Vine reviews appearing - target 60 total reviews at 4.0 star by Day 60
- Maintain 30-unit minimum stock across 10 Bengaluru Blinkit dark stores daily
- First Rs.699 drop window activates - Lowest in 30 Days badge triggers automatically

PHASE 3

SCALE

DAYS 61 TO 90

- Activate Blinkit PLA spend - Rs.25,000 per month - 10 dark stores - Champion Series only
- 10-Minute Challenge campaign drops - 50 micro-influencer seeding across IG & YouTube
- List Champion Series on Zepto simultaneously - zero extra inventory if supply is consistent
- Expand Bengaluru coverage to 25 dark stores if velocity above 50 units per day
- Decision gate - expand to Mumbai and Delhi or consolidate Bengaluru for one more month

GATE: Cross 3.8 star on Amazon by Day 30 or Phase 2 does not start.

GATE: Hit 4.0 star with 80+ reviews by Day 60 or PLA spend stays off.

TARGET: 50 units per day, 4.2 star rating, PLA ROAS > 3x.

Campaign Visual 4 - drop in manually after generation

Day 1

Pause paid traffic.
Fix listing. Reset price.

Day 30

3.8 star rating gate.
Vine reviews start.

Day 60

4.0 star with 80+ reviews.
PLA ready.

Day 90

50 units per day.
Expand or consolidate.

सुनने का हक़

*The right to hear.
The right to be heard.*

Every child studying in noise. Every worker on a crowded bus.
Every first-jobber on a video call from a shared room.
They all deserve quality sound. Ubon makes that possible.

No celebrity. No studio. Real homes. Real faces. Real India.

Zero celebrity spend

Documentary style

Aspirational dignity

Visual 1 - Sunne Ka Haq

Visual 2 - Sunne Ka Haq

THE ENEMY IS NOT A BRAND

The enemy is the belief that quality sound is only for people who spend Rs.3,000 plus. boAt owns youth swagger, JBL owns premium. Nobody owns dignified aspiration for the buyer who cannot spend big. That is Ubon's white space.

Survey: 4.1% brand consideration today. This campaign builds the node that gets Ubon into the evoked set.

THE TARGET - THE ASPIRING ACHIEVER

Age 18 to 28. First-generation college student or early-career worker. Shared room - hostel, PG, joint family. Uses earphones daily for studying and work calls. Has never spent above Rs.700 on audio. Believes quality is not for them. Ubon changes that.

Survey: 38.2% primary use case is work calls. No brand at Rs.999 speaks to this buyer with dignity.

MICRO-INFLUENCER EXECUTION

50 to 100 nano creators. Tier 2 and Tier 3 cities. Real homes. Real accents. Not metro LinkedIn professionals. Each creator films a 30-second documentary-style Reel showing their real study or work setup with Ubon. No script. No polish. The rawness is the point.

Sunne Ka Haq is not a tagline. It is a positioning. The first Indian audio brand to say every person deserves to hear well - regardless of how much they earn.

You ordered Ubon. You had 10 minutes. What did you do?

Campaign Visual 3 - 10-Minute Challenge

You ordered Ubon. You had 10 minutes. What did you do?

Order Ubon on Blinkit. Film what you did while waiting. Post it. Tag Ubon and Blinkit. The most creative 10-minute thing wins Rs.10,000 Blinkit credit.

Inspired by Scream for Ice Cream - participation plus reward plus shareability. Every video is free advertising for both Ubon and Blinkit.

WHY THIS WORKS

Blinkit's 10-minute delivery is the product. Ubon owns that moment. Every video tags both brands. Blinkit has a reason to co-promote because the campaign showcases their core promise. Ubon gets co-marketing from a Rs.50,000 crore platform for free.

The 10-minute window is the creative canvas. Indians love jugaad. This campaign lets them prove it.

THE MECHANIC - HOW IT RUNS

Step 1 - Order Ubon earphones on Blinkit.
Step 2 - Film a 30-second video of what you do in 10 minutes.
Step 3 - Put Ubon on when it arrives. Keep doing the thing.
Step 4 - Post on Instagram Reels. Tag Ubon and Blinkit.
Step 5 - Leaderboard of most creative entries goes live weekly.

THE BLINKIT CO-PROMOTION ANGLE

Every video in this campaign shows someone ordering on Blinkit and the delivery arriving in 10 minutes. This is Blinkit's advertising done by Ubon's buyers. Approach Blinkit marketing team with the campaign mechanic and propose a co-branded push notification to Blinkit's user base. Zero media spend for Ubon if Blinkit co-promotes.

Blinkit benefit: thousands of organic videos showing 10-minute delivery. Ubon benefit: platform-wide push notification to millions of users. Both win.

Sunne Ka Haq builds the brand. The 10-Minute Challenge builds the viral moment. Together they give Ubon a brand identity and a cultural conversation simultaneously.

Three checkpoints. Nine metrics. Every number is a gate. Miss the gate and the next phase does not start.

Day 30 is product. Day 60 is trust. Day 90 is scale.

**DAY 30 - PRODUCT FOUNDATION****3.8****AMAZON STAR RATING**

Champion Series Amazon rating must cross 3.8 star. Below this and Phase 2 does not begin. No exceptions.

GATE: ALL THREE MET - ADVANCE TO PHASE 2
GATE MISSED - STAY IN PHASE 1 - DIAGNOSE AND FIX

DAY 60 - TRUST SIGNALS**4.0****AMAZON STAR RATING**

Champion Series must hit 4.0 star on Amazon. This is the minimum trust threshold before PLA spend activates on Blinkit. Below 4.0 and paid traffic does not convert.

Survey: 49% of buyers filter at 4.0 star minimum

80**TOTAL REVIEWS ON AMAZON**

80 plus reviews on Champion Series listing. Combined Vine plus organic. Below 80 the listing looks too thin for a considered Rs.999 purchase.

Benchmark: Boulton crossed 100 reviews in first 45 days of Blinkit push

15**INFLUENCER REELS LIVE**

15 Sunne Ka Haq documentary Reels published by nano creators. Content indexed on Instagram before Blinkit PLA goes live so buyers can find social proof when they search the brand.

Budget: Rs.500 to Rs.2,000 per creator

GATE: ALL THREE MET - PLA SPEND ACTIVATES DAY 61
GATE MISSED - HOLD PHASE 2 - NO PLA UNTIL METRICS ARE HIT

DAY 90 - SCALE SIGNALS**50****UNITS PER DAY - BENGALURU**

50 Champion Series units sold per day across 10 Bengaluru dark stores. This velocity signals to the Blinkit algorithm to expand shelf space automatically.

Below 50 - hold Bengaluru - above 50 - expand to 25 stores

3x**BLINKIT PLA RETURN ON AD SPEND**

Every Rs.1 of PLA spend must return Rs.3 in Blinkit sales. Below 3x means the listing is not converting and the product or listing needs fixing before more spend.

Monitor weekly in Blinkit Ads dashboard from Day 61 onwards

500**UGC VIDEOS - 10-MINUTE CHALLENGE**

500 organic user videos tagging Ubon and Blinkit from the 10-Minute Challenge. This is the virality threshold after which the campaign becomes self-sustaining without seeding spend.

Seeding: 50 creators. Target: 500 plus UGC videos

GATE: ALL THREE MET - SCALE AND EXPAND
GATE MISSED - STAY IN SCALE PHASE - OPTIMIZE HARDER

सुनने का हक़

Quality sound is not a privilege. It is a right.

Ubon has the product. The price. The infrastructure.
The only thing missing is the conviction to own this space.

One city. One SKU. One campaign. Ninety days.
That is all it takes to move from invisible to inevitable.

10-Minute Challenge

Six solutions. Rs.20 per unit to start.

The most expensive fix on this list costs less than one celebrity post.

boAt owns budget audio. JBL owns premium.
Ubon can own something neither of them ever will –
the belief that great sound belongs to everyone.
